Ranelli concluded, “Central's excellent results reflect the dedication and leadership of our management and the significant commitment to excellence of all our employees, ensuring our customers and consumers are receiving the very best in products and services.”

The company currently expects adjusted earnings per fully-diluted share of \$1.10 or higher for fiscal 2016, an increase of at least 49% from the prior year.

Pet Segment Fiscal 2016 Second Quarter Results

Second quarter net sales for the Pet segment increased 24.3% to \$275.3 million, an increase of \$53.8 million from the same period a year ago. Acquisitions accounted for approximately two-thirds of the increase with the remaining one-third from organic growth. Organic sales were driven by stronger dog & cat and professional

revenues as well as higher sales of other manufacturers' products. The Pet segment's branded product sales were \$216.9 million, and sales of other manufacturers' products were \$58.4 million.

The Pet segment's operating income rose 19.8% to \$32.4 million compared to \$27.1 million in the second quarter of 2015. Pet operating margin decreased 40 basis points, due to the impact of two recently acquired businesses.

Garden Segment Fiscal 2016 Second Quarter Results

Net sales for the Garden segment decreased 3.7% to \$265.9 million, a decline of \$10.2 million compared to a year ago, due in part to exiting a marginally-profitable private label fertilizer customer relationship and the Company's exit from the seasonal decor business. Grass seed sales during the period were up significantly, as were sales of other manufacturers' products, while wild bird feed was down due to unfavorable weather. The Garden segment's branded product sales were \$215.8 million in the second quarter of 2016 and sales of other manufacturers' products were \$50.1 million.

The Garden segment's operating income in the quarter improved \$5.1 million to \$44.4 million, a gain of 12.9% compared to operating income of \$39.3 million in the second quarter of 2015. Garden operating margin improved 250 basis points to 16.7 percent. The increase in operating margin was driven mainly by higher grass seed profits.

Year-to-Date Results

For the six months ending March 26, 2016, the Company reported net sales of \$901.1 million, an increase of \$96.2 million, or 11.9 percent, from the prior year period. Branded product sales were \$709.3 million, a 10.5 percent increase from the comparable 2015 period, and sales of other manufacturers' products were \$191.8 million, a 17.8 percent increase. Excluding \$14.3 million of charges in the first quarter related to the Company's refinancing of its fixed rate notes, adjusted net income rose \$33.4 million and adjusted earnings per fully diluted share increased 89 percent to \$0.66 from \$0.35 in the six month period a year ago.

Use of Non-GAAP Financial Measures –

We report our financial results in accordance with U.S. generally accepted accounting principles (GAAP). However, management believes that certain non-GAAP financial measures that exclude the \$14.3 million impact of the redemption of our 2018 Notes and the issuance of our 2023 Notes recognized during the quarter ended December 26, 2015 may be useful in certain instances to provide additional meaningful comparisons between current results and results in prior operating periods that should be considered when assessing our ongoing performance and providing consistency with our prior year disclosure. The amount is included in interest expense

in the condensed consolidated statements of operations. We believe that the non-GAAP financial measures provide useful information to investors and other users of our financial statements, such as lenders. Management also uses these non-GAAP financial measures in making financial, operating and planning decisions and in evaluating our performance and we believe these measures similarly may be useful to investors in evaluating our financial and operating performance and the trends in our business from management's point of view. While our management believes that non-GAAP measurements are useful supplemental information, such adjusted results are not intended to replace our GAAP financial results and should be read in conjunction with those GAAP results.

(A) The Non-GAAP financial information excludes the impact of the redemption of our 2018 Notes and issuance of our 2023 Notes. As a result of the bond redemption, we incurred incremental expenses of \$14.3 million, comprised of a call premium payment of \$8.3 million, a \$2.7 million payment of overlapping interest expense for 30 days and a \$3.3 million non-cash charge for the write off of unamortized deferred financing costs and discount related to the 2018 Notes. These amounts are included in interest expense in the condensed consolidated statements of operations.

Adjusted earnings per-fully diluted share

The company currently expects adjusted earnings per fully-diluted share (a non-GAAP measure) of \$1.10 or higher for fiscal 2016. A reconciliation to expected earnings per fully-diluted share (a GAAP measure) has not been provided as the adjusted earnings per share guidance excludes the impact of any non-operational charges or impairments that may occur, and are not known or contemplated at this time, as well as the impact of the redemption of our 2018 Notes and issuance of our 2023 Notes.
